

## Strategy, values and mission statement

Our focus for 2025 is to ensure that a greater number of apprentices and students complete their training and graduate, strengthen our learners' basic skills, and provide a safe and inclusive environment for our learners. Our strategical work is founded on the following values described in what we call in Norwegian "Plattform Stovner":

- We believe in the potential of all learners
- We are a brain-inclusive and trauma-informed school
- We strive to achieve good relations and a safe environment
